1/ Before 1953, excludes Alaska and Hawaii; includes Puerto Rico and the Virgin Islands, beginning October 1950 (under the 1950 amendments to the Social Security Act) and Guam, beginning July 1959 (under the 1958 amendments). See also footnotes 3, 4, and 5.

2/ December of each year.

3/ Program initiated October 1960 under the 1960 amendments.

4/ Between October 1950 and October 1962 includes as recipients the children and 1 parent or caretaker relative other than a parent in families in which the requirements of at least 1 such adult were considered in determining the amount of assistance; beginning October 1962, may include both parents or 1 caretaker relative other than a parent.

5/ Program initiated October 1950 under the 1950 amendments.

6/ Excludes Idaho beginning September 1957, Nebraska, September 1952-December 1953 and beginning November 1963, Indiana beginning January 1962; data not available.

7/ Beginning October 1950, total exceeds sum of columns because of inclusion of vendor payments for medical care from general assistance funds, and from special medical funds; data for such expenditures partly estimated for some States.

1/ Based on civilian population as of January 1, 1964; estimated by the Social Security Administration. 2/ Based on data for 32 States for medical assistance for the aged and for 53 States for aid to the permanently and totally disabled; no program in operation in remaining States. 3/ Based on data for 46 States. See footnote 6. 4/ Less than 0.05. 5/ Includes recipients of payments made without Federal participation. Recipient rates excluding these recipients are as follows: California, 108; Missouri, 141; and Pennsylvania, 71. 6/ Number of persons aided not currently available. 7/ Estimated. 8/ Includes an unknown number of persons receiving medical care, hospitalization, and burial only.

1/ State data estimated as of January 31, 1964, by the Social Security Administration.
2/ Number of recipients represents the number in whose behalf one or more payments for medical care were made during February 1964. Since MAA is exclusively a medical care program, the average period of care is relatively short compared with income-maintenance programs. The total number of MAA recipients during a year is estimated to be about two and one-half times as large as the average monthly total.
3/ Less than 0.5.
4/ Less than 50.

1/ Federal participation in vendor payments for medical care under programs except general assistance, which is financed entirely from State and local funds, was made possible beginning October 1, 1950, by the Social Security Amendments of 1950. Since then there have been a number of changes in the method used to compute the Federal share of assistance. A 1957 change tended to depress the amount of vendor medical payments in 1957 and 1958.

2/ Averages based on cases receiving money payments, vendor payments for medical care, or both. Averages for general assistance not computed because of difference among States in policy or practice regarding use of general assistance funds to pay medical bills for recipients of the federally aided categories.

3/ Includes amounts used to pay medical bills for recipients of the federally aided categories.

1/ For States operating pooled funds or other prepayment plans, data represent payments out of these funds to specified type of vendor. Totals do not agree with those shown in tables 5 and 7 which represent assistance payments into these funds.
2/ Includes drugs dispensed by medical practitioners when these costs are not reported separately.
3/ Less than $500.
4/ Amounts for general assistance included in "Type of service not reported."
5/ Except for aid to families with dependent children and general assistance, "Other practitioners' services" and "Dental care" included in "Other."
6/ "Other practitioners' services" included in "Physicians' services."
7/ For general assistance, "Dental care" included in "Other."
8/ For general assistance, "Other practitioners' services" included in "Other."
9/ For general assistance, includes school medical aid.
10/ For general assistance, "Other practitioners' services" included in "Physicians' services."

1/ Not comparable with annual data for assistance based on monthly series (table 2); mainly because data in this table include more cancellations of payments.
2/ Data for part of period were included in a total reported for aged, blind, and disabled under provisions of Title XVI. For purposes of this release these data are distributed to OAA, AB, and APTD on an estimated basis.
3/ Includes money payments not subject to Federal participation as follows: $6,468 in Connecticut, $1,167,832 in Massachusetts, $58,994 in New Jersey, $587,437 in New York, and $27,479 in North Dakota.
4/ Less than $500.

1/ Not comparable with annual data for assistance based on monthly series (table 2) or with amount of Federal grants to the States.
2/ Program initiated in October 1960 under the Social Security Amendments of 1960.
3/ Less than 0.05 percent.
4/ Data for part of period were included in a total reported for aged, blind, and disabled under provisions of Title XVI. For purposes of this release these data are distributed to OAA, AB, and APTD on an estimated basis.
5/ Includes expenditures for medical care program administered by public assistance agency and financed from funds other than those for old-age assistance, aid to families with dependent children, aid to the blind, aid to the permanently and totally disabled, or general assistance.
6/ Estimated.
7/ Incomplete.
8/ Data not available.

1/ Averages based on cases receiving money payments, vendor payments for medical care, or both. Money payments may also include small amounts for assistance in kind and vendor payments for other than medical care. Averages for general assistance not computed because of difference among States in policy or practice regarding use of general assistance funds to pay medical bills for recipients of the special types of public assistance. 2/ Except for aid to families with dependent children, data for each program represent average payments for recipients of the specified type of assistance under the combined program for aid to the aged, blind, or disabled, or for such aid and medical assistance for the aged. 3/ Estimated. 4/ Average payment not computed on base of fewer than 50 recipients. 5/ No program for aid to the permanently and totally disabled.

Public Assistance in the Counties

The following maps show, for old-age assistance (OAA), aid to families with dependent children (AFDC), and aid to the permanently and totally disabled (APTD), the quintile ranking of every county in the conterminous United States in relation to two important measures of the program:

1. The recipient rate, the definition of which varies by program as follows:
   a. OAA--Number of recipients per 1,000 population aged 65 and over.
   b. AFDC--Number of children receiving assistance per 1,000 population under age 18.
   c. APTD--Number of recipients per 10,000 population age 18-65.
2. The average monthly payment. For OAA and APTD, the average payment represents the average per case; for AFDC, it represents the average per recipient (child or adult).

The data were obtained from reports submitted by State public assistance agencies for June 1960.[1]

Although the maps are based on 1960 data, their general configurations are also valid at the present time, because recipient rates and average payments change very slowly. For most counties, the quintile ranks at the present time are the same as they were in 1960, and a current set of quintile maps would be very similar to these for 1960.

The quintile rankings were obtained by arraying the counties in descending order according to the recipient rate or average payment. The list of counties was then divided into five equal-size groups, from highest to lowest. States which did not operate an APTD program in 1960 (Arizona, Indiana, New Mexico) are omitted from the distribution for that program; counties having no recipients in a program which the State operated were given a recipient rate of zero but were omitted from the distribution of counties according to average payments under the program.

The maps show at a glance how any particular area of the Nation compares with all other areas in the extent and amount of public assistance provided under the programs. They show that the highest proportions of persons assisted but the lowest average payments usually are found in the rural counties of the southern and border States. The highest payments are in the far west, west north central, and industrial northeast regions.

The wide variations in recipient rates and average assistance payments reflect not only social and economic circumstance of areas, but also differences in the public assistance programs of the States.

---

[1]These maps also appear in "Public Assistance in the Counties of the United States: June 1960," a November 1963 publication of the Bureau of Family Services. The publication also includes a table giving for each county in the Nation the recipient rate, the average payment, and the quintile ranking for these measures for each of the three programs.
